SUMMARY

A flexible developer who works as a Frontend Developer, Full Stack Developer, Web Developer, or SEO Developer depending on what a project needs. Currently a Junior Frontend Developer at Cellwego PH, building responsive, accessible interfaces with React, TypeScript, and Angular, with additional freelance full-stack and SEO experience for direct clients, including leading a team of 2 developers on a four-month client website redesign. Proven results include a perfect 100/100 SEO score and 94/100 Performance on Google PageSpeed Insights.

EXPERIENCE

Junior Frontend Developer
Cellwego PH Jun 2026 - Present, Onsite

- Build responsive, mobile-first layouts and interactive UI patterns for Velo by Velox, a mobile device retail and repair management app (React, TypeScript, Vite) with offline-first sync as an installable PWA, and the Velox company website.
- Also work on and fix backend API endpoints (Node.js, Express, MySQL) supporting the platform, contributing across the stack as needed.

Freelance Web Developer
Direct Clients 2024 - Present, Remote

- Deliver websites for business clients end-to-end — UI implementation, WordPress (Gutenberg) customization, responsive QA, and post-launch support and bug fixes.

Lead Web Developer (Project-Based)
Maroev Cyber Systems Aug 2026 - Nov 2026

- Led a team of 2 developers through a four-month redesign of the company website, working with the client on constant revisions and direct communication. Brought onto the project through the trust earned on the Bamacom project. Built on WordPress (Gutenberg) and hosted on Hostinger.
- Set up and configured plugins, implemented SEO on every page, applied light and dark mode, migrated the content from the previous website, put security measures in place, and fixed layout bugs; also designed some of the pages.

Full Stack Developer Intern
IT Squarehub Global Services Corporation Jul 2025 - Oct 2025, Clark, Pampanga

- Led a team of 4 interns to design and deliver a full-stack certificate generator system on time, earning the Innovative Project Excellence Award.
- Built and maintained the app using Angular 18, Node.js, and MySQL, with Cloudinary for image storage, deployed on Vercel and Render.
- Earned Leadership and Outstanding Intern Awards for delivering a complete, production-ready solution.

SEO Developer (Project-Based)
Bamacom Inc. Dec 2024 - Mar 2025, Pasig City

- Led a full WordPress/Elementor redesign and on-page SEO overhaul using Yoast, achieving a perfect 100/100 SEO score on Google PageSpeed Insights.
- Reached 100/100 Accessibility and Best Practices, and 94/100 Performance on desktop audit.

PROJECT

Velo by Velox — Offline-first mobile device retail and repair management PWA covering Purchase, Sales, Inventory, and Repair tracking (React, TypeScript, Vite frontend; Node.js, Express, MySQL API).

Velox — Company Website — Marketing website for Velox, the independent technology company behind Velo (React, TypeScript, Vite).

Maroev Cyber Systems — Website Redesign — Four-month company website redesign for a cybersecurity firm, led a team of 2 developers; plugins, per-page SEO, light/dark mode, site migration, and security setup (WordPress, Gutenberg, Hostinger).

Mother & Child Pharmacy (MedFind) — Real-time medicine finder and pharmacy management system for 2 branches (Angular 18, Node.js, Express.js, MySQL, IndexedDB).

IT Squarehub — Certificate Generator System — Full-stack certificate generation, preview, and data management app (Angular 18, Node.js, MySQL, Cloudinary).

Bamacom Inc. — Website Redesign & SEO — Perfect 100/100 SEO, Accessibility, and Best Practices score on PageSpeed Insights (WordPress, Elementor, Yoast SEO).

Mind Matters — Mental health awareness platform for Holy Angel University's Guidance Office (Angular 18, Angular Material, Tailwind CSS).

Valiant E-Sports Page — Website with cart and login for Valiant Esports, Holy Angel University (HTML, CSS, JavaScript, PHP, MySQL).

Analyze like Mayk — WordPress blog showcasing sports, esports, and anime content analysis.

Papa J's Samgy Page — Product page with RESTful API integration and a Firebase-backed customer list.
