SUMMARY

Recent Information Technology graduate and Full Stack Developer experienced in leading teams, building production web applications, and deploying full-stack systems using Angular 18, Node.js, and MySQL.

EXPERIENCE

Full Stack Developer Intern

IT Squarehub Global Services Corporation

July 2025 – October 2025, Clark, Pampanga

- Led a team of 4 interns to design and deliver a full-stack certificate generator system, completing the project on time and earning the Innovative Project Excellence Award.
- Built and maintained application using Angular 18, Node.js, and MySQL for efficient automated document processing across the organization.
- Implemented certificate generation, preview, and data management features, streamlining workflow for the company's internal operations.
- Integrated Cloudinary for image storage, improving media handling and optimizing asset delivery performance.
- Deployed full-stack system using Vercel and Render, ensuring a stable production environment across frontend and backend services.
- Earned Leadership and Outstanding Intern Awards among the full intern cohort for delivering a complete, production-ready end-to-end solution.

SEO Developer (Project-Based)

Bamacom Inc.

December 2024 – March 2025, Pasig City

- Led a team to redesign and optimize Bamacom Inc.'s business website, achieving a perfect SEO score of 100/100 on Google PageSpeed Insights.
- Implemented on-page SEO using Yoast on WordPress, attaining scores of 100 in Accessibility and 100 in Best Practices on Google PageSpeed Insights.
- Optimized overall website performance, achieving a 94/100 Performance score on Google PageSpeed Insights desktop audit.
- Managed project coordination and delegated tasks to team members, ensuring timely delivery of all SEO milestones.

PROJECT

MedFind System — Mother & Child Pharmacy

Holy Angel University • www.motherandchildpharmacy.com/ • November 2025 – March 2026

- Led development of a web-based medicine finder and pharmacy management system for Mother and Child Pharmacy in Porac, Pampanga.
- Built using Angular 18, Node.js, Express.js, and MySQL with features including real-time medicine search, inventory management, and pre-order processing.
- Deployed on Vercel and Railway, supporting 2 pharmacy branches with offline sync via IndexedDB for continuous operation.

Bamacom Inc. — Website Redesign and SEO Optimization

Holy Angel University • bamacomserv.com/ • November 2024 – March 2025

- Led a team to redesign and optimize Bamacom Inc.'s business website using WordPress, Elementor, and Yoast SEO.
- Implemented on-page SEO strategies achieving a perfect score of 100/100 in SEO, Accessibility, and Best Practices on PageSpeed Insights.
- Optimized overall site performance achieving a 94/100 Performance score on PageSpeed Insights desktop audit.
